## New circular design, clean and green heating

Heta's new Scan-Line 8 wood burning stove offers unique design features and burns more cleanly than ever before

The new circular-designed wood burning stove now opens up new possibilities for the home, with more choice of materials enabling a more personal style and décor.

The new Scan-Line 8 from Heta is an industrial-style, Danish design wood burning stove with classic lines.

Featuring a diameter of 44 cm and a height of 101 cm, the stove is so compact that it works well in many different rooms and types of housing.

aluminium trim*

available from 1. March 2017

 Made in Denmark

### Technical Info:

Nominal kW 4,5  
 Heat output kW 2-8  
 Est. room size m<sup>2</sup> 20-130

### Measurements

Height 1011 mm  
 Width 443 mm  
 Depth 443 mm  
 Weight from 100 kg

### Distance to flammable materials

Behind stove 120 mm  
 At the sides 350 mm

CO 13% O<sub>2</sub>) 0,05 %  
 Dustmeasurement (mg/Nm<sup>3</sup>) <3  
 NO<sub>x</sub> (13% O<sub>2</sub>) (mg/Nm<sup>3</sup>) 99  
 Efficiency 81%  
 Outlet pipe size ø 150 mm

### More design options

The Scan-Line 8 has specifically been designed to have a classic look, featuring a large glass window through to the beautiful flames and to give you the opportunity to select from a variety of finishes.

The new wood burning stove is available in steel, cast iron tiles on the side, cast iron doors and top. There is also a choice of colours for the aluminium profiles. Should you prefer a stove that puts the heat "into storage", there is a Scan-Line 8 version that has had the cast iron tiles replaced with soapstone tiles.

### Cleaner and green heating

By thinking of the environment and using wood for the fire, you can feel good about going carbon neutral and benefiting the environment compared with using other heating systems. The size and shape of the fire chamber gives the Scan Line 8 an impressive 81% efficiency rating. It also adopts the cleanest process to date, resulting in record-low particle emissions of 0.65 grams per kilogram of burnt wood.

### Smart features

The front door closes automatically using a damping function, and the door handle is removable. Behind the bottom door of the stove, you will find a 5 litre ash pan and storage space. Prepared for direct connection to outdoor air and installation of Heta's special HAC burning system.

Scan-Line 8 is a 4.5 kW stove that allows for a heat output ranging from 2 to 8 kW. This means that the stove can warm up a living area of up to 130 m<sup>2</sup> in a well-insulated home.
